

# How to create a product available for Quoting

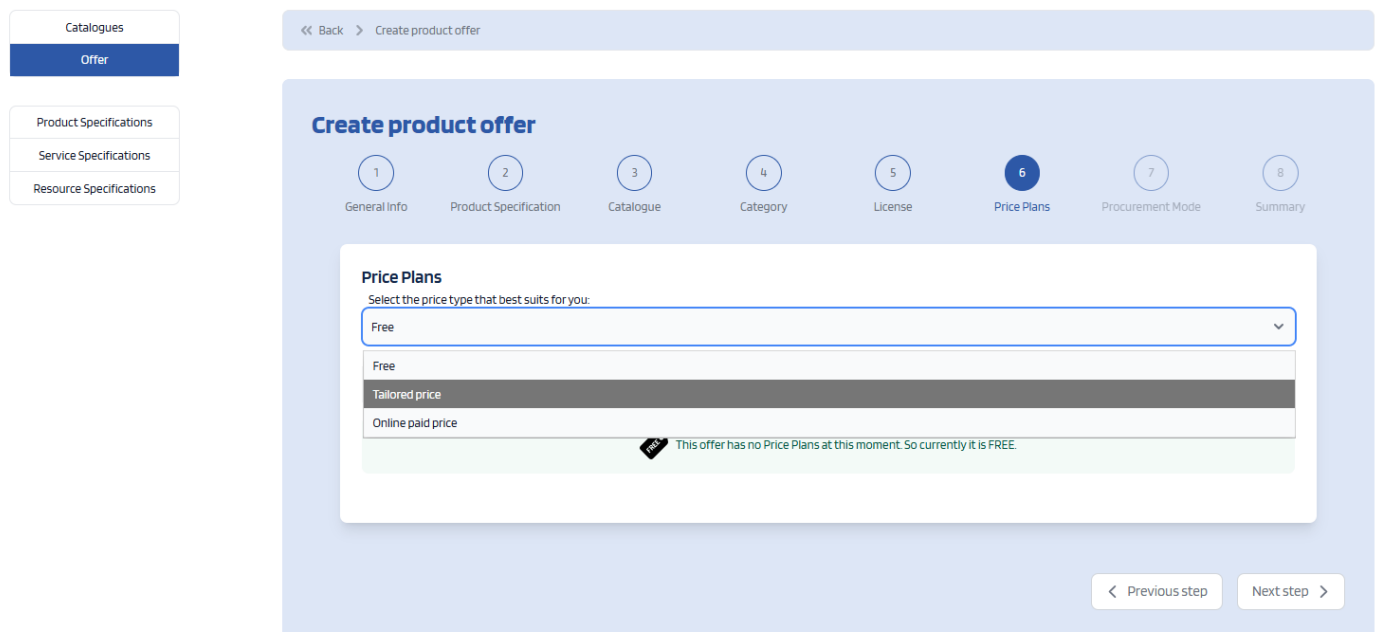

A quotable product offering is different in one aspect of its creation from other products.

The majority of the process to create a product is unchanged from the normal one, and information about it can be found here

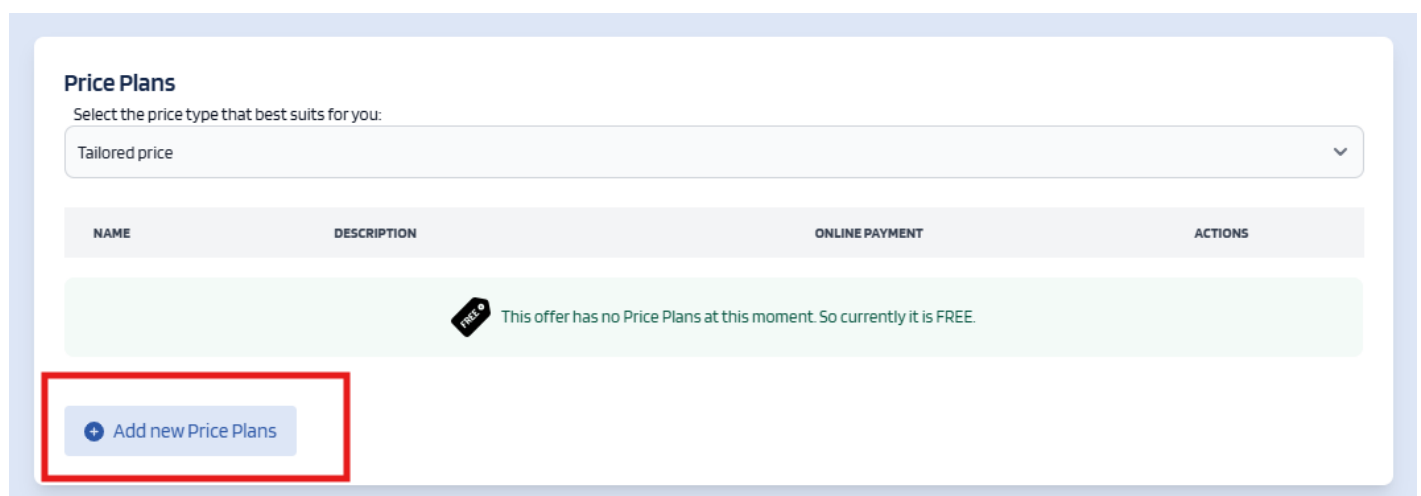

[Managing orders, products and subscriptions](#)

The key step in creating a quotable product offering is the following

## My offerings

The screenshot shows the 'Create product offer' interface. On the left, there is a sidebar with 'My offerings' and a list of categories: Catalogues, Offer, Product Specifications, Service Specifications, and Resource Specifications. The main area is titled 'Create product offer' and features a progress bar with 8 steps: 1. General Info, 2. Product Specification, 3. Catalogue, 4. Category, 5. License, 6. Price Plans (current step), 7. Procurement Mode, and 8. Summary. The 'Price Plans' section contains a dropdown menu with the text 'Select the price type that best suits for you:'. The dropdown is currently set to 'Free'. Below the dropdown, there is a list of options: 'Free', 'Tailored price', and 'Online paid price'. A green banner with a 'FREE' icon and the text 'This offer has no Price Plans at this moment. So currently it is FREE.' is displayed. At the bottom right, there are buttons for '< Previous step' and 'Next step >'.

This is a detailed view of the 'Price Plans' step. It shows the dropdown menu with 'Tailored price' selected. Below the dropdown is a table with the following columns: NAME, DESCRIPTION, ONLINE PAYMENT, and ACTIONS. The table is currently empty. A green banner with a 'FREE' icon and the text 'This offer has no Price Plans at this moment. So currently it is FREE.' is displayed. At the bottom left, there is a button labeled '+ Add new Price Plans' which is highlighted with a red box.

When creating a product offering, at the "Price Plan" step, you need to select " **Tailored price** ", then click on " **Add new Price Plan** " and fill in the details.

This will ensure that your product will display a button "Request a Quote" on it, when viewed in the marketplace
